

How to determine the INV percentage for each product/services that merchant offers?

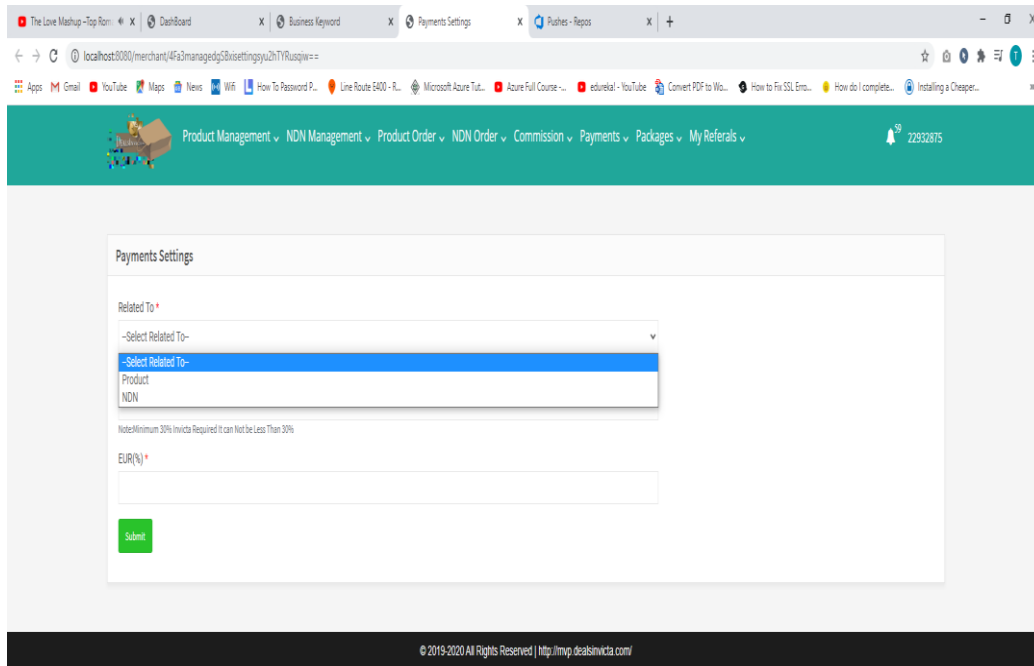

Go to <https://merchant.dealsinvicta.com/>.

Prior to the placement of any product/ service you have to determine the % amount of the payment/price in Inv. Bear in mind that minimum is 30 %.

Pay attention to the fact that the change of the % results in change of the percentage for all already listed Products( delivery needed) or NDN( no delivery deals)

Go to Payment- Payment settings

From 'Related To' drop down menu select Product- in case you are planning to upload a good that need shipment services.

Or choose 'NDN' ( no delivery needed) in case you are planning to upload services or goods that do not need shipment services.

Pay attention to the fact that the change of the % results in change of the percentage for all already listed Products ( delivery needed) or NDN( no delivery deals)

Product

INV(%) \*

70.00

Note: Minimum 30% Invicta Required It can Not be Less Than 30%

EUR(%) \*

30.00

Submit

Put the intended % of INVICTA and EUR and press Submit.

When a buyer try to purchase your product the % of Invicta and EUR will be shown on the platform.

Do not forget to mention the desired % of Invicta for the product in the product full description in order for the buyer to be informed in advance for the exact product/service price.
